Hayes company TMD Technologies Ltd wins second Queen's Award for Enterprise in two years!!

On the 12th August 2005 TMD was presented with a Queen's Award for Enterprise 2005 for Innovation, by Wing Commander Edna Partridge OBE, AE DL (Deputy Lieutenant, London Borough of Hillingdon), at its premises in Swallowfield Way. This was the company's second Queen's award in two years; the first having been in 2004 for International Trade Performance.

The subject of this years award for Innovation was the development and manufacture of a revolutionary high voltage power supply for radar, which achieves a noise level 100 times lower than that of previous designs. This provides the radar with significantly better range and accuracy of target identification.

In the presence of the Worshipful Mayor and Mayoress of Hillingdon, Councillor Jill Rhodes JP and Mrs Alice Enskat, together with many of TMD's employees, Wing Commander Partridge presented Peter Butcher, Chairman & Managing Director with the crystal bowl and certificate signed by the Queen and the Prime Minister.

In her address, Wing Commander Partridge said ".....last year, when TMD's Chairman Peter Butcher said he would be trying for another award the following year - at first I though he was joking and then that he was dreaming! So when I heard TMD had won again I was delighted and astonished, as I have never before presented a Queen's Award to one company two years in a row. A Queen's Enterprise Award for Innovation is not awarded lightly - every application is carefully evaluated by experts in the field, and to win it must be evident that the application stands head and shoulders above the normal levels of achievement"

In his reply Chairman & MD Peter Butcher congratulated everyone involved with the award, in particular Mr Derek Newton, Chief Engineer whose creative design work was at the heart of the Innovation and also the team of colleagues who had supported him closely throughout the project.

Peter Butcher continued

“This year is a double celebration for TMD – our second Queen’s Award and also our 10th anniversary since the MBO from THORN-EMI plc. These two awards promise very well for the future of TMD; in 2004 we demonstrated our success in International Trade which has been highly significant to the growth of the company, and in 2005 we have proved ourselves to be at the technical forefront of our industry and capable of the innovative flair which is vital for our continued success and stability”

TMD is located in Hayes, West London - close to Heathrow Airport and is a fully integrated company with all functions under one roof. Currently our staff number approximately 170, many of whom live locally. We have good employee relations, a relatively low staff turnover and by steadily recruiting in order to fulfil new contracts, we are making an important contribution to the resurgence of high-tech industry in Hayes and increased local employment.
